EDUCATION

University of Guelph

Sept 2024 – Fall 2029

Bachelor of Computing, Computer Science (Co-op), Minor in Statistics

Guelph, ON

- Maintaining a 4.0 GPA (94% average); Dean's List every semester.

EXPERIENCE

Reservely | [Launch](#) | [GitHub](#) | [YouTube](#)

May 2025 – Present

Founder | React, Node.js, Supabase

Markham, ON

- Founded Reservely, a lightweight, low-cost reservation system tailored for small restaurants and cafes.
- Secured \$3,000 in non-dilutive funding from the Ontario government to build the MVP and support early development.
- Implemented a plug-and-play booking link, enabling restaurants to start accepting reservations with minimal setup.

Code Ninjas

June 2025 – Sept 2025

Lead Instructor

Markham, ON

- Delivered 300+ hours of programming instruction to train 200+ students, improving code quality and completion.
- Built project tracking and debugging workflows to accelerate student iteration and project delivery.
- Led multiple junior instructors to standardize technical lessons across classes, reducing instructional variance.

Riot Games

June 2025

Brand Ambassador

Toronto, ON

- Supported live esports event operations by troubleshooting gaming PCs, peripherals, and software issues.
- Coordinated with production staff on technical setup, teardown, and attendee flow during high-traffic events.

PROJECTS

NephroRx | HackRx 2025, UWaterloo | Python, TypeScript, Node.js, Docker, MongoDB

[Launch](#) | [GitHub](#) | [YouTube](#)

- Built a full-stack medical platform processing MRI/CT data into interactive 3D models with volumetric analysis.
- Integrated data pipelines and backend services to support clinical insights, enabling AI-assisted analysis workflows.

ClearSite | Next.js, TypeScript, Supabase, Gemini API

[Launch](#)

- Worked with my landlord to Build an asset management platform leveraging structured SQL and NoSQL data.
- Integrated Gemini API to transform database records into natural language summaries and recommendations.
- Designed backend workflows to dynamically query, process, and pass structured data into LLM pipelines.

GryphonGrid | React, Supabase, Node.js

[Launch](#)

- Developing a roommate matching platform using behavioral data and AI-driven scoring for compatibility.
- Implemented LLM-based explanations to justify match quality, improving transparency and user trust.
- Built full-stack infrastructure handling authentication, data storage, and real-time user interactions.

Am I Cooked? | Gryph Hacks 2025 | React, Node.js, Supabase

[Launch](#) | [GitHub](#) | [YouTube](#)

- Built an LLM-powered web app analyzing resumes and generating job-readiness insights using heuristic + AI scoring.
- Implemented prompt-based evaluation pipelines to extract structured insights from unstructured user input.
- Deployed full-stack system in under 30 hours, generating 200+ user responses within 2 weeks.

TECHNICAL SKILLS

Programming: Python, C, Java (OOP), JavaScript, Assembly, SQL, HTML, CSS

Frameworks / Libraries: React, Next.js, Node.js, Flask, Three.js

Tools & Platforms: Docker, Git/GitHub, Linux, Vite, LaTeX, MongoDB, Supabase, API Integration, LLM Models

VOLUNTEER EXPERIENCE

Computer Science Student Club, University of Guelph

May 2024 – Present

Vice President of Internal Affairs

Guelph, ON

- Coordinated with faculty and student councils to ensure alignment across departmental initiatives.
- Presented funding requests from subsidiary clubs to an approval board.
- Supervised events for computer science students hosted by the club.
