PROJECTS

NephroRx | [Launch](#) | [GitHub](#) | [YouTube](#) | Python, TypeScript, Vite, Node.js, Docker, MongoDB

- Built a medical imaging platform that converts MRI and CT DICOM/NII scans into interactive 3D kidney models.
- Implemented a volumetric analysis pipeline to compute organ volume for GFR estimation and drug dosing support.
- Developed a secure full stack system with a React-based 3D visualization frontend and Dockerized deployment.

Codle | [Launch](#) | [GitHub](#) | React, Vite, Firebase, Node.js, TailwindCSS

- Built a daily coding puzzle game with drag and drop logic challenges and streak-based progression in a team of four.
- Implemented automated daily challenge updates and user data through cloud integration and CI/CD deployment.

Am I Cooked? | [Launch](#) | [GitHub](#) | [YouTube](#) | React, Vite, Node.js, Supabase

- Built a web app assessing job-seeker "cooked-ness" via real-time Supabase data.
- Implemented user authentication and persistent results to improve returning user experience.

Capitalist FC | [GitHub](#) | Java Swing

- Developed an incremental simulation game where players grow a fanbase through upgrades and investments.
- Applied OOP principles to manage entities, resources, and progression systems efficiently.

TECHNICAL SKILLS

Programming: C, Java (OOP), Python, JavaScript, Assembly, SQL, HTML, CSS

Web & Tools: React, Next.js, Node.js, Flask, Three.js, Docker, Git/GitHub, Linux, Vite, LaTeX

Databases & Cloud: MongoDB, Supabase, API Integration, Linux

VOLUNTEER EXPERIENCE

Computer Science Student Club, University of Guelph

Vice President of Internal Affairs

May 2024 – Present

Guelph, ON

- Coordinated with faculty and student councils to ensure alignment across departmental initiatives.
- Presented funding requests from subsidiary clubs to an approval board.
- Supervised events for computer science students hosted by the club.
