EDUCATION

University of Guelph

Sept 2024 – Fall 2029

Bachelor of Computing, Computer Science (Co-op), Minor in Statistics

Guelph, ON

- Maintaining a 4.0 GPA (92.5% average); Dean's List every semester.

EXPERIENCE

Magnet Forensics

Sept 2026 – Dec 2026

Incoming Software Developer Co-op

Waterloo, ON

- Shipping production features for digital forensics software used by law enforcement and enterprises.

RBC

June 2026 – Aug 2026

GenAI Engineer Intern

Toronto, ON

- Built an evaluation framework testing an audit AI agent's faithfulness, groundedness, and reproducibility.
- Developed an executive risk reporting agent aggregating web and ORX data to surface AI, fraud, and vendor risks.
- Automated preliminary risk triage for RBC's AI governance intake form, streamlining agent review and approval.

Code Ninjas

June 2025 – Sept 2025

Lead Instructor

Markham, ON

- Delivered 300+ hours of programming instruction to train 200+ students, improving code quality and completion.
- Led multiple junior instructors to standardize technical lessons across classes, reducing instructional variance.

Stealth Startup | a16z-Backed Spatial Intelligence

May 2026 – June 2026

Spatial Data Associate

Toronto, ON

- Captured 3D LiDAR scans of real-world environments, building spatial datasets to train Large World Models.

Riot Games

June 2025

Brand Ambassador

Toronto, ON

- Supported live esports event operations by troubleshooting gaming PCs, peripherals, and software issues.

PROJECTS

Reservely | Founder | React, Node.js, Supabase

[Launch](#) | [YouTube](#)

- Founded Reservely, a lightweight, low-cost reservation system tailored for small restaurants and cafes.
- Secured \$3,000 in non-dilutive funding from the Ontario government to build the MVP and support early development.
- Implemented a plug-and-play booking link, enabling restaurants to start accepting reservations with minimal setup.

NephroRx | HackRx 2025, UWaterloo | Python, TypeScript, Node.js, Docker, MongoDB

[Launch](#) | [GitHub](#) | [YouTube](#)

- Built a full-stack clinical platform for chronic kidney disease care, combining eGFR-based medication dosing with interactive 3D models rendered from MRI/CT data for volumetric analysis.
- Automated PDF ingestion with OCR and NLP pipelines to extract patient data and power real-time dosing calculations.

MyRoommate | React, Supabase, Node.js

[Launch](#)

- Developing a roommate matching platform using behavioral data and AI-driven scoring for compatibility.
- Implemented LLM-based explanations to justify match quality, improving transparency and user trust.

TECHNICAL SKILLS

Programming: Python, C, Java (OOP), JavaScript, Assembly, SQL, HTML, CSS

Frameworks / Libraries: React, Next.js, Node.js, Flask, Three.js, Pandas, NumPy

Tools & Platforms: Docker, Git/GitHub, Linux, Vite, LaTeX, MongoDB, Supabase, Firebase, API Integration, LLM Evaluation

VOLUNTEER EXPERIENCE

Computer Science Student Club, University of Guelph

May 2024 – Present

Vice President of Internal Affairs

Guelph, ON

- Coordinated with faculty and student councils to ensure alignment across departmental initiatives.
- Presented funding requests from subsidiary clubs to an approval board.
